Please note, the above increases do not apply to all products within the categories and only highlight the most relevant price increases. These timber increases are applicable to branches in Scotland, prices in England and Wales may vary.

Why we're raising our prices. The price of timber and other wood products continues to rapidly fluctuate as a result of increases of worldwide demand. This demand has resulted in timber producers switching supply to other markets that often will pay more. This has resulted in suppliers having to pay higher prices for the small supply that is available to the UK market.
